FUNCTION: INVOLVED IN THE TRANSPORT OF MULTIPLE SULFUR-CONTAINING COMPOUNDS, INCLUDING SULFATE AND THIOSULFATE (BY SIMILARITY).

SUBCELLULAR LOCATION: Inner membrane-associated (Potential).

SIMILARITY: BELONGS TO THE ABC TRANSPORTER FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     GITTYYYTHDQEEAMAISDQIAVMKDGYIQQIGRPKELYHKPANEFYATFIGRTNIIPAN
